The gameplay of Tomb Raider: Underworld differs from the Tomb Raider series in that players take on the role of Lara Croft as she embarks on a quest to investigate the supernatural elements behind the disappearance of her father. It is a prequel game to the Tomb Raider series and chronicles the events leading up to the first game in the series. The game was released in North America on February 12, 2010, in Australia on March 1, 2010, and in Europe and South America on March 8, 2010. Tomb Raider: Underworld was also released in China on April 9, 2010. The game was met with mixed critical reception.GameplayTomb Raider: Underworld is a third-person adventure game played from a cinematic viewpoint. The game is set in the original timeline of the Tomb Raider video game series. The first game in the series, Tomb Raider, was released for the Nintendo Entertainment System in 1992, and its first three games were ported to the Game Boy Color by Microïds. The game begins with Lara Croft waking up in a lake at the beginning of a new adventure. Key Features: -New- Uncover the mystery of your missing father, discover the shocking truth about your family, and stop the evil forces of a ruthless dictator.Other Links 2010 World Cup: Spieth, Menz
